Video/Speaker Observation Form

Video Title/Speaker: Mr Wilton

Subject summary: mr wilton needed to make a device to Record surgery and be out of the way of the surgeon. He used a boom and lift the camera. The device has to be Stable and tilt in all directions. The device had to use batteries And have a screen to watch the live video.

Coollest thing you learned: there are cool things that weld And move the table not the welding head. That is really cool And I want one.

What you disliked: I want to see pictures of the working Thing and now just of the prototypes. That would be really Cool.
